

# GeoTime® Server

Communicate & collaborate case analyses across your team and devices

## Collaborate and present the story of your case

- ▶ Work more closely together in the context of the case
- ▶ Look at the same report, putting everyone on the same page
- ▶ Consolidate case information and data in one single workspace
- ▶ Collaborate confidently and securely on your organization's existing IT infrastructure

## Maximize expert capabilities

- ▶ Seamless transition of case reports between analysts and investigators
  - More moving forward; Less redoing
  - Experts focus on the analysis work; Investigators focus on asking the questions and solving the case
- ▶ View what your analysts see - no technical restrictions in the way

## Share case data with your organization

- ▶ View and playback all the data related to a case
- ▶ No silos: Expand GeoTime Server across departments, allowing general usage of the tool's mapping capabilities
